WHEN WILL I GET A NEW CAR?

This is a question we are asked hundreds of times each day and one we wish as much as you do we could answer.

The following facts and figures may help answer this question:

1. It is conservatively estimated that over 1 million automobiles are sold each year.
2. Every car sold it is estimated that 90% never get used to the 300,000,000 miles it is only used for a short time of its life.
3. No matter how hard it is to believe, 5% of the total cars sold will be returned to the dealer in the next year.
4. Conservatively estimates indicate that over 1,000,000 cars per year will be returned to the dealer in the next year.
5. If you are one of 5%, it becomes obvious that they are not satisfied with their cars. But, the dealer will not tell you this.
6. Therefore, it is wise to be an informed buyer when your next car is purchased.

Do not become a victim to the idea that upon disposing of your used car in the black market, you can simply take the cash and readily use it to obtain a new car.

CONSULT YOUR NEW CAR DEALER

Do not rush to dispose of your car until you check with your new car dealer. When you purchase a new car, any car you are buying or used in a used condition, you do not have a problem. If you are in the market for something new and need help with this decision, our new car dealers are here to help you.

NO ANTICIPATED DROP IN USED CAR PRICES BEFORE JULY 1st

Do not be misled by various claims and misleading advertisements. As the optimism in this market will evaporate during the summer months, the price of used cars will go up significantly. According to the first half of 1965, prices will remain stable, but it is possible that prices will come before July 1st.
