Don't Let Anybody Fool You!

These Things Will Happen
If The Anti-Trust Lawyers Have Their Way

When the anti-trust lawyers from Washington do their job, they will destroy the American automobile industry, just as they did in the soap industry several years ago. The results will be disastrous.

For one thing, it will be impossible for anyone to buy a automobile. Prices will go up, and the high cost of living will only add to the misery of the ordinary American.

In addition, the American automobile industry is a source of national pride. It is an industry that employs thousands of workers and provides a vital contribution to the national economy. If it were destroyed, the country would suffer.

We have heard that the anti-trust lawyers are going to take on the automobile industry and destroy it. But we mustn't let them get away with it.

It Will Destroy A&P

The anti-trust lawyers are going to destroy the A&P, which is the biggest discount store chain in the country. This will have serious consequences for the whole economy.

The A&P is a source of employment for tens of thousands of workers. If it were destroyed, the unemployment problem would become even more severe.

Your Food Will Cost More

The anti-trust lawyers are going to destroy the A&P, which is the biggest discount store chain in the country. This will have serious consequences for the whole economy.

The A&P is a source of employment for tens of thousands of workers. If it were destroyed, the unemployment problem would become even more severe.

Others Will Be Hurt

The anti-trust lawyers are going to destroy the A&P, which is the biggest discount store chain in the country. This will have serious consequences for the whole economy.

The A&P is a source of employment for tens of thousands of workers. If it were destroyed, the unemployment problem would become even more severe.
