Is Economy for Others Only?

"Economy" was a general term used when it was first used in the 1930s. It was used to describe the economic conditions in the United States, which were characterized by high unemployment, low production, and a general feeling of gloom. The word "economy" has since become a common term used to describe the economic conditions in any country. It is a term that is used to describe the economic conditions in any country.  Captains of Their Fate

As this country, through the efforts of the military and naval forces, has been able to bring about a complete and final victory over the Axis powers, it is the duty of the civilian population to do its part in the same way. The civilian population must be organized and trained to meet the needs of a total war. This is the only way to ensure the final and complete victory over the Axis powers.
