Vegetables to Find Ready Market in '51

NEW BRUNSWICK—Consumers will eat more fresh vegetables in 1951, forecasts Joseph P. Hask, extension marketing specialist at Rutgers University.

Hask bases his prediction on the likelihood of more employment and higher consumer income next year. Good business conditions, supported by the expected booming propensities program, should put more dollars in consumers' pockets, he says. Some of this added income will be spent on vegetables and other food.

Farmers throughout the country may grow more vegetables in 1951. Supplies of fertilizer, farm machinery, and most other items used in production are expected to be adequate to meet production needs. Insecticides, however, may be hard to get and farmers are advised to order supplies early.

New Jersey farmers may grow more vegetables as they did last year. However, Hask hazards a guess that prices to New Jersey growers will be about the same as they were in 1950 or slightly higher. Vegetable prices have not kept pace with consumer incomes in recent years. Further increases in consumer incomes without

some "catching up" in vegetable prices seem unlikely.

New Jersey farmers will be faced with increasing costs and higher taxes again next season. Even if vegetable prices do improve, it seems doubtful that growers' net incomes will change much from their 1950 incomes. Consumers will continue to eat large quantities of canned and

fresh vegetables next year. Many requirements should be met for the year's production. Since the peak year of 1949, the United States has produced the major truck crops grown for processing has declined, according to Hask. If demand for processed food is as strong as expected, higher production of processing crops in 1951 is likely, he says.

However, the recent trend, however, somewhat higher prices to farmers will be necessary to get more production and to cover increasing costs.

New Jersey vegetable growers sent considerably more tonnage to processors in 1950 than in the year previous. The figures, though incomplete, show a large increase in cauliflower tonnage, beans, and snap beans for processing. Tonnage of lima beans and green peas was down from 1950.

ANTI-FREEZE QUIZ FOR MOTORISTS

PERMANENT-TYPE ANTI-FREEZE SHOULD BE LEFT IN YOUR CAR

(A) ONE WINTER (B) INDEFINITELY

ANSWER: (A). No anti-freeze is "permanent"—there's bound to be some loss from leakage or overflow. No matter what type it is, if left in the car, it will eventually freeze and cause serious damage.

Comfort benefits by better cab ventilation and new seat construction. Safety profits by newly developed brakes. Increased durability has been engineered into the chassis through a number of improvements which extend through the line.

In its 1951 models Chevrolet will make available trucks in 10 wheelbases, including the 170-inch wheelbase which carries the 1-ton chassis added this year.

Gross vehicle weight range from 4,000 to 16,000 pounds. In this connection an important development is announced in higher ratings of the 4100 to 4400 series.

Through changes in the front axle, springs and tire size, the maximum gross vehicle weight has been raised from 12,500 to 14,000 pounds. Minimum GVW of the series 4100 is 4,000 lbs. and has been raised to 4,400 lbs.

As a year ago Chevrolet will make available two engines of the economical valve-in-head design. They are the 105-horsepower and the 135-horsepower Chevrolet engines.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

When anti-freeze is added to the radiator, it will protect the engine from freezing. It will also protect the radiator from freezing.

KNOW YOUR GOVERNMENT

THE PEOPLE WANT TO KNOW

Government—Federal, state and local—costs New Jersey taxpayers nearly one and three-quarter billion dollars a year. At least that was the total tax bill in 1949, the latest year for which complete figures are available. With the Nation on a war footing, further drastic increases at the federal level are in prospect. Faced with higher taxes, more and more citizens today are demanding all possible curtailment of non-war expenditures and the highest possible value for every dollar spent by government.

This interest is indicated by the activity of numerous local taxpayer associations in New Jersey and of many other citizen groups which today are broadening their programs to include the study of government. Also, state taxpayer associations are active today in 37 states, including New Jersey. These organizations are serving a widespread and increasing demand by citizens for clear and concise information about government.

Recognizing this need, the New Jersey Taxpayers' Association members among its more im-

portant functions the dissemination of facts about government. One feature of this service is its "Know Your Government" series, written especially for New Jersey home town newspapers. The current article in the 67th issue in the series and marks the beginning of the 14th year of this service to the press and public.

WEEKS NEWS

New Jersey Fish and Wildlife News

(TRENTON)—The State Division of Fish and Game, Department of Conservation and Economic Development, today announced that through a printer's error, special permits authorizing hunting during the two-day antlerless deer season, January 19 and 20, in Essex, Morris and Somerset counties, read that hunting hours are from 9 A. M. to 6 P. M.

This is an error as the permits should read the holder of the special deer permit is granted permission to kill one doe or antlerless buck in the designated counties between 7 A. M. to 6 P. M. on the designated day, the deer season.

Highway Safety

By MARTIN J. FERBER

N. J. Division of Motor Vehicles today issued a warning to drivers that the requirements of the new driver's license examination are being strictly enforced. It is stressed that the driver must be able to see clearly and to be able to see clearly on the highway. Many drivers with adequate vision become involved in highway accidents.

Effective vision starts in the driver's mind. That is to say it is a mental qualification. Some motorists see things that others miss even though their eyesight is no better. To see well you have to pay attention.

Good vision also depends on experience and common sense. An experienced driver with common sense can see things that others miss even though their eyesight is no better. To see well you have to pay attention.

Sharp mental attitude and good judgment held a good driver to see more than an average driver. But it goes against him out saying that a driver should have good eyesight as well as a proper mental attitude.

Your eyes must be sharp enough to read traffic signs at a safe distance to avoid confusion and hesitation. If you have trouble reading signs or if your eyes become tired when you drive, there are danger signals. Better get your eyes tested before it's too late.

Despite a proper mental attitude and good eyes, adequate vision depends on two other things: the windshield and headlights. During these winter days, it's always easy to keep the windshield clean, but it's worth the effort. Obstructed vision is one of our greatest safety problems in winter driving. The windshield wiper and defroster should always be in the top condition. One window kept slightly open will help prevent heavy frosting on the inside.

Headlights must be effective for safe driving at night. Be sure to wipe off the headlights lenses as well as the windshield daily. To maximize safety, safety depends on clear vision. And the latter in turn depends on a proper mental attitude, good eyes and equipment kept in effective condition. When vision is reduced, speed should be reduced as well. Winter safety is as simple as that.

There are now 76,696 Units of Cub Scouts, Boy Scouts and Explorers in the Boy Scouts of America.

SECRETS OF THE SCREEN

Now—no more clogged filler screens in your oil burner! The anti-clogging property of FOA-5X in Shell Fuel Oil for home heating closes off oil burner holes... eliminates a major cause of oil burner service calls. 15 years of Shell research and tests went into the development of FOA-5X. A telephone call to us will put FOA-5X to work for you.

SHELL FUEL OIL WITH FOA-5X

Just Phone
WycOFF 4-1000

Sam Braen Oil Co.

Brookside Avenue WycOFF, N. J.

Say maybe I'm missing some calls!

Probably you are—if you're making one telephone call after another! For while you're using the telephone, no one can call you. And if you're on a pay phone, no one else on your line can make or receive phone calls either.

When you have a number of telephone calls to make, it's a good idea to space them. That way you'll avoid missing calls—and your party line neighbors will have an opportunity to make or receive their calls, too!

Alexander Patterson New Head of N. J. AAA State Organization

TRENTON—Alexander Patterson, vice-president of the North Jersey Automobile Club for the past 23 years, was elected chairman of the New Jersey Conference AAA Automobile Club at a meeting held here this week.

In taking over office, Mr. Patterson handed the post to the new chairman, Mr. Eugene J. Patterson, secretary of the club. Mr. Patterson, who has been chairman of the club since 1934, is a resident of 891 East 19th Street, Trenton.

The election meeting was attended by representatives of the state American Automobile Association clubs in New Jersey.

Also elected to office were C. Morris Newberg, Camden, vice chairman; Samuel Lindy, Newark, treasurer; and Carleton R. Patterson, Trenton, secretary.

There are 692,325 adults serving in the Boy Scouts of America as volunteer leaders.

...Economic Highlights...

U. S. News & World Report

Communist China's voice in the national affairs of the world is becoming more and more potent. It is a voice that is being heard in the halls of power in Washington, D. C. and in the corridors of the United Nations. The Chinese are now a major factor in the world's affairs.

Yet the Western powers certainly do not see eye to eye on the matter. Some of them would go a long way toward meeting Stalin's demands, Britain, for example, despite the fact that British troops are fighting in Korea, wishes to give Red China a seat in the UN and let her have Formosa, Italy and France, despite brave words from some of their leaders, seem willing to go to the most extreme lengths to avoid war—lengths which would, in the view of many authorities, permit the Communists to give the United States the way for Russian domination of the world.

This is a sky-high price, but Russia shows no evidence that she might be willing to lower it. It is equally clear that the Communists give the United States the way for Russian domination of the world.

There are 692,325 adults serving in the Boy Scouts of America as volunteer leaders.

STOCKPILING for DEFENSE

Manpower... Materials... Money...

With the war on, the need for stockpiling for defense is more than ever. The United States must be prepared to meet any emergency that may arise. This means stockpiling of manpower, materials and money.

Manpower: The United States must have a large reserve of trained men ready to go to war. This means a large reserve of men who have been trained in the use of modern weapons and in the tactics of modern warfare.

Materials: The United States must have a large reserve of raw materials and finished goods. This means a large reserve of steel, copper, rubber, and other materials that are essential to the production of war materials.

Money: The United States must have a large reserve of money. This means a large reserve of gold and silver, and a large reserve of U. S. dollars.

Jersey Teachers Rarely Possess Fringe Benefits

TRENTON — No teacher in New Jersey possesses the security of the many "fringe benefits" which AFL and CIO unions have acquired in recent years, according to a survey of the NEW JERSEY EDUCATIONAL REVIEW.

Every board of education grants up to ten days of absence with pay for sickness, but beyond this few boards go, partly because of the lack of permissive legislation. Growing in popularity is the practice of allowing teachers to accumulate part of their unused "sick" days, up to a limit established by the board of education. But in no school system is the practice followed of paying for group insurance or hospitalization privileges for teachers, as is the policy in many large industrial concerns.

Because several boards have expressed a desire to assume such payments, in whole or in part, to make teaching in their communities more attractive, the New Jersey Educational Association has urged legislation this year permitting boards to include group insurance and hospitalization in their employee welfare plans. "A bill will be permissive only," the association says, "if it makes it possible for a board to make such payments compulsory."

DRIVE SAFELY

Effective vision starts in the driver's mind. That is to say it is a mental qualification. Some motorists see things that others miss even though their eyesight is no better. To see well you have to pay attention.

Good vision also depends on experience and common sense. An experienced driver with common sense can see things that others miss even though their eyesight is no better. To see well you have to pay attention.

Sharp mental attitude and good judgment held a good driver to see more than an average driver. But it goes against him out saying that a driver should have good eyesight as well as a proper mental attitude.

Your eyes must be sharp enough to read traffic signs at a safe distance to avoid confusion and hesitation. If you have trouble reading signs or if your eyes become tired when you drive, there are danger signals. Better get your eyes tested before it's too late.

Despite a proper mental attitude and good eyes, adequate vision depends on two other things: the windshield and headlights. During these winter days, it's always easy to keep the windshield clean, but it's worth the effort. Obstructed vision is one of our greatest safety problems in winter driving. The windshield wiper and defroster should always be in the top condition. One window kept slightly open will help prevent heavy frosting on the inside.

Headlights must be effective for safe driving at night. Be sure to wipe off the headlights lenses as well as the windshield daily. To maximize safety, safety depends on clear vision. And the latter in turn depends on a proper mental attitude, good eyes and equipment kept in effective condition. When vision is reduced, speed should be reduced as well. Winter safety is as simple as that.

There are now 76,696 Units of Cub Scouts, Boy Scouts and Explorers in the Boy Scouts of America.

Pauline Tromp To Wed Fred Miller

Mr. and Mrs. J. Tromp, 200 Central Ave., Hawthorne, have announced the engagement of their daughter, Pauline, to Fred Miller, 21 Park Ave., Hawthorne.

Miss Tromp is a graduate of the Hawthorne High School.

against the employer who was forced to discharge him. Among the many cases presented in the statement are the following:

Case No. 3—"In February this claimant resigned to get married. Less than one week later she filed for unemployment compensation benefits. Two days later she was awarded benefits and she was drawing benefits and she

continued to draw benefits until she received the maximum possible amount, \$572. Immediately she married another employee of the employer who was charged with her benefits so there was no question as to why she quit. How actively do you suppose this lady was seeking work when she quit for the express purpose of getting married, but nonetheless filed for benefits only two days later?"

Case No. 16—"The employer said that one of his employees requested an hour or so off one afternoon each week because he

had business with the employer. The employer stated that he had no particular objection to this procedure but simply wanted to verify the employee's excuse. After some checking, it was found that the employee had actually been visiting the employer's office faithfully each week. The employee had good reason to make these visits; he worked until May 24, 1949, when he was laid off. He began drawing unemployment compensation benefits the following week. On May twenty-seventh the claimant also filed for private plan ten-

porary disability benefits. This claimant was now in good shape. He was drawing \$22 a week for unemployment and \$25 a week for temporary disability. All told, this claimant drew \$154 in unemployment, compensation benefits and \$650 in temporary disability benefits. The claimant's fraud was finally discovered by sheer accident while the employer attempted to recall the claimant for work. In this case the claimant finally made deduction of \$154."

DRIVE SAFELY.

Local Civilian

(Continued from Page 1)

Kayson Gr., training of auxiliary police. The new headquarters of the Civil Defense Council will soon be set up in the basement of the Hawthorne Public Library, Council chairman William E. Fairbank of the supplies division reported. Partitions are presently being erected and phones will be installed. Use of the building has been donated through the efforts of Mrs. E. A. Johns, chairman of

the Public Library Association. It is expected that the next council meeting will be held in the library's basement. Fairbank stated that when the new headquarters are completed the civil defense program in the borough can be operated from this point.

Arnold Dater, of the welfare division announced that his committee attended the defense school being conducted at Princeton University.

Much has been accomplished by the Hawthorne Civil Defense Council since its recent organization, Chairman King commented. He said, however, that there was a great deal of work to be accomplished before the program can work efficiently.

He called on the citizens of Hawthorne who can volunteer for any type of work to contact their area warden, or write to him. At least 2,000 residents are needed to participate in the program.

"The attack, if it comes, will not be on a 'time-table' basis, but may happen when least expected," King stated. For this reason he urged preparedness to lighten losses as much as possible.
