A prominent banker tells you why—

PART OF YOUR PRESENT INCOME SHOULD GO INTO U.S. SAVINGS BONDS!

By Dr. Paul H. Haynes

Most of us think of saving money, but how many of us think of saving ourselves? Many of us talk about saving money for the future, but how many of us save our money for ourselves? The answer is simple: most of us don't save our money for ourselves.

The reason for this is that the government has made it easier for us to save money. The U.S. Savings Bond is a great way to save money for yourself. The bond is safe, easy to buy, and the interest you earn is tax-free.

But the government has also made it easy for us to ignore our savings. The bond is easy to buy, but it's also easy to forget. The bond is safe, but it's also easy to lose.

The answer is simple: save your money for yourself. The U.S. Savings Bond is a great way to save money for yourself. The bond is safe, easy to buy, and the interest you earn is tax-free.

For the big things in your life, be ready with U.S. Savings Bonds!
