for 1939

F WE KNEW anything better we could do for the country than make good motor cars, we By every one doing his best in the job he thinks most useful, this country is going to regain its momentum. We have tried to do our best in

When business was suddenly halted in its recovery more than a year ago, we determined that we should keep going anyway, if not at full-volume motor car production, then at getting ready for greater motor car values that would help future

EXPANDING FOR THE FUTURE We began to build 34 million dollars' worth of new plants and equipment. We felt that if we could not employ all our men building motor cars, we would employ as many as we could building better production facilities. We were told, of course, that this was no time

for expansion, that a wiser business policy would be to "hold everything"—which means, stop everything. But no one ever got anywhere standing still. Besides, we are not defeatists. We do not believe this country has seen its best days. We believe this country is yet in the infancy of its growth. We believe that every atom of faith invested in our Country and our People will be amply justified by the future. We believe America is just beginning. Never yet have our People seen real Prosperity.

Never yet have we seen adequate Production. But we shall see it! That is the assurance in which we have built. Business is not just coming back. It will have to be brought back. That is now becoming well understood in this country; for that reason 1939 will be a co-operative year. Manufacturers, sellers and buyers will co-operate to bring back the busi-ness that is waiting to be brought back.

This construction program is almost completed It has increased activity and payrolls in a number of related industries. It has given us better facilities for building better cars and trucks, and eventually our new tractor which is being perfected.

THIS MEANS MORE VALUE The current program has provided a new tire plant, which will turn out a part of our tire requirements . . . a new tool and die plant that will help us cut the cost of dies . . . and a steel-press plant that will enable us to make more of our own automobile bodies. These are in addition to the plants we already had for producing glass, iron, steel, plastics, and many other things.

We don't supply all our own needs, of course, and never expect to. The Ford engine is one thing

and knowledge we gain are freely shared with our suppliers, and with other industries. We take no profit on anything we make for ourselves and sell to ourselves. Every operation, from the Ford ships which first bring iron ore to the Rouge, is figured at accurate cost. The only profit is on the finished result—the car or truck as it comes off the line. Some years, there is no profit for us. But we see to it that our customers always profit. A basic article of our business creed is that no sale is economically constructive unless it profits the buyer as much as or more than the seller.

Our new plants have helped us build more value into all our cars for 1939. That means more profit on the purchase to the purchaser. We have not cut quality to reduce costs. We simply will not build anything inferior.

NEW TESTING EQUIPMENT While we were putting up new plants to produce cars, we constructed new equipment to test them. The first weather tunnel of its kind ever built for automobile research went into operation at our

Henry and Edsel Ford, on the occasion of the 35th anniversary of the founding of the Ford Motor Company, June 16, 1938 It makes any kind of weather to order. The that no one's hand touches but ours. Of nearly weather it delivers every day would take months everything else we use we build some quantity ourselves, to find, if possible, better and more economical ways of doing it. The experience to find in Nature. Our cars are weather-tested to give you good service in any climate anywhere.

In other tests, every part of the car is pun-ished unmercifully. Then our engineers tear it down to see if they can find abnormal wear or any sign of weakness. The money we spend on tests saves you money on repairs. And your family car is safer and more dependable when we put it in your hands.

THE NEW CARS We have two new Ford cars for 1939-better cars and better looking—but we also have an entirely

It's called the Mercury 8. It fits into our line between the De Luxe Ford and the Lincoln Zephyr. It is larger than the Ford, with 116-inch wheelbase, hydraulic brakes, and a new 95-horsepower V-type 8-cylinder engine. We know that our 1939 cars are cars of good quality. We think they're fine values in their

With new cars, new plants, new equipment, the whole Ford organization is geared to go forward. . . . FORD MOTOR COMPANY, Dearborn, Michigan

the referendum which will be held at next Tuesday's election, on the question of authorizing maintenance funds for The Passaic County Park Commission.

In our estimation the referendum affords an opportunity for Hawthorne to place a stamp of approval upon the sphemidal accomplishments of this board. Less than a dozen years ago there was a danger that desirable lands for park purposes would be absorbed in one fashion or another. Today we have the right to say how it shall be detected the part of the Park Commission on what are acled the point where a maintenance fund must be set up in order to preserve the large investment that has been made during the parks.

The Park Commission now has reached the point where a maintenance fund must be set up in order to preserve the large investment that has been made during the park counts in the parks.

The Park Commission has calched the point where the right to say how it shall year.

Chevrolet Takes Big Strides Ahead for 1939 ON DISPLAY AT

Entire Floor of Waldorf-Astoria Taken Over By General Motors The General Motors Show at the Walderf-Asteria, New York, will

open at 2 P. M., Friday, November

1, and daily, thereafter from 10 KILLS ALL INSECTS A.M., to midnight through Friday, November 18. "What's New for FLIES, ROACHES, BED BUGS, ANTS. 1939" will be the theme of th FLEAS, MOSQUITOES. WATER BUGS. show which will occupy the entire third floor of the Waldorf. MOTHS, THEIR EGGS AND LARVAE. This entire floor of the hotel wi be transformed to resemble a colorful formal garden, centerin about the grand ballroom. Here the central decorative motive will be a pool, surrounded by growing flow J. E. HOGAN ers and palm trees about which

create an atmosphere of tropical gidaire, Diesel, Fisher Body, Tern stedt and other General Motors Visitors to the show will be adhousehold and commercial products and accessories will be dission will be free.

Visitors to the show will be adhousehold strange of the Waldorf and admission will be free.

Sent DEAL MANDER Senator McAdoo holds the \$30-and admission will be free.

New Aero-stream styled bodies combine with major mechanical improvements to provide new beauty, safety; comfort and operating ease, in the 1939 Chevrolets, presented October 22, and featured at the big auto shows this month. The new models are offered on two classis, the Master De Luxe and the Master 85, both of which are powered with Chevrolets of militaries with the contract of militaries with the contract of month. The new models are offered on two chassis, the Master De Luxe and the Master 85, both of which are powered with Chevrolet's famous six-cylinder valve-in-head engine.

A new vacuum gear shift mechanism with steering column control, optional on all models at small entra cost, does 30 per cent of the work of shifting gears. The Master De Luxe series features a new riding system, in which a brand new Chevrolet Knee-Action mechanism is scientifically co-ordinated with new ride atabilizer and double-acting hydraulic shock absorbers to furnish a smooth, soft ride.

Central picture is the new Master De Luxe Sport Sedan. Upper right: front end view of the 1939 cars Upper left:
Master De Luxe front suspension unit, complete; Lower left: accessibility and finger-tip case of operation are two major features of Chevrolet's vacuum gear shift with steering column control; Lower right: As the handbrake on all models is re-located under the cowl, front compartment floor is cleared in cars with vacuum gear shift.

Fair, designed by Norman Bel UI INLII JURIUL 1 all Geddes will be shown.

The decorative spectacle 'Miami-in-New York' has been created through the transformation of the stage area of the grand ballroom into a southern club house, with a canopied terrace. Herbie Kay and Required By Federal

One was in 1926 in Engsee Valley Authority-not more sensations but more facts . . . is nineteen times as important as land when the BBC put on a skit

"For instance, is the long-discussed allocation of dam and reservoir costs as between flood control, navigation and power fairly made? How much of the wide difference in interest tairly made? How much of the wide difference in interest rates as between government bonds and utility company bonds does the TVA deserve to be allowed in counting its costs of power production? Does the TVA pay the full equivalent of taxes that private property-owners would pay? Is its enjoyment of the franking privilege on mail and of government rates on freight a substantial factor in operating expenses?"

All reciprocal trade agreements and tariff slashes, therefore, made in an effort to get foreign trade, without taking into consideration the great home market, are simply an unconscious effort to throw away the American market in an away the American market in an away the American market in an effort to hoost the openineteenth.

States when Will Rogers impersonated President Coolidge and thousands mistook it for an actual Presidential address. Mome retently, the FCC severely censored the president address, the president address, make the president address, make the president address, make the foreign trade, without taking into consideration the great home market, are simply an unconscious effort to throw away the American market in an away the American ma

Looking back on the investigation, it becomes increasingly effort to boost the one nineteenth we have these two anecdotes to reclear how little of tangible importance it actually produced.
