EDITORIAL...

Freedom of Choice

The great advantage of the present system of education is that it allows students to choose their own paths. The system provides a variety of options, allowing students to pursue their interests and passions. This flexibility is crucial in today's fast-paced world, where the ability to adapt to change is essential. Students can choose to focus on traditional subjects like math and science, or they can explore more creative fields like art and music. This system also encourages critical thinking and problem-solving skills, as students are encouraged to think independently and make their own decisions. Overall, the current system allows students to pursue their own goals and interests, making it an effective way to prepare them for the future.
