## WITH AT STION

Suppose Rodney the amazing appear next month... winner of the Hazelton director can take a bow!

His unusual program known as the "Quintessential Radio One Act Theatre" presented on the terrace of the Hazelton Hotel at 9 p.m. is not only one of the most prestigious broadcasts ever undertaken by a local station but with its cast of over one hundred people he has at last given the other audience something new in radio.

Mr. Rodney whose talents are famed in America and abroad, spent years in Europe reading day and night to find one hundred of the finest correct plays available.

After much effort, he uncovered the one hundred—each a masterpiece and written by the leading authors on the Continent. He brought them to this country over three months ago and ever since has been engaged with offers to publish and produce them on the stage.

"At last," says Rodney "the time has ripened for the successful presentation of correct play in America." Therefore, on each broadcast he presents three or more of these plays, all with completely different themes and treatments. By so doing he is able to give a really varied program in addition to much music by Don Albert and songs by a local vocalists.
